

PeopleAdmin Reduce Cost, Increase Productivity and Data Accuracy

The Only Open SaaS Platform that Can Connect All of Your HigherEd Back-Office Systems

Technology silos cause inefficiencies across all areas. 88% of administrators and staff agreed not having a unified ecosystem prevents them from realizing their full potential.*

Focus on the Things That Matter, Not Your Systems

Establishing uniform data structures, simplifying workflows and rules, and maintaining integrations across ecosystems can be complex and time-consuming. PACx™ (PeopleAdmin Connector) addresses the need for creating a connected environment of disparate applications amongst many institutions. Most institutions struggle with integrations that are:

- Tightly coupled and less resilient to change
- Expensive to maintain one-off fragile integrations
- Its own integration which creates hurdles for a single source of truth

Connect to any SaaS or On-Prem Software Application

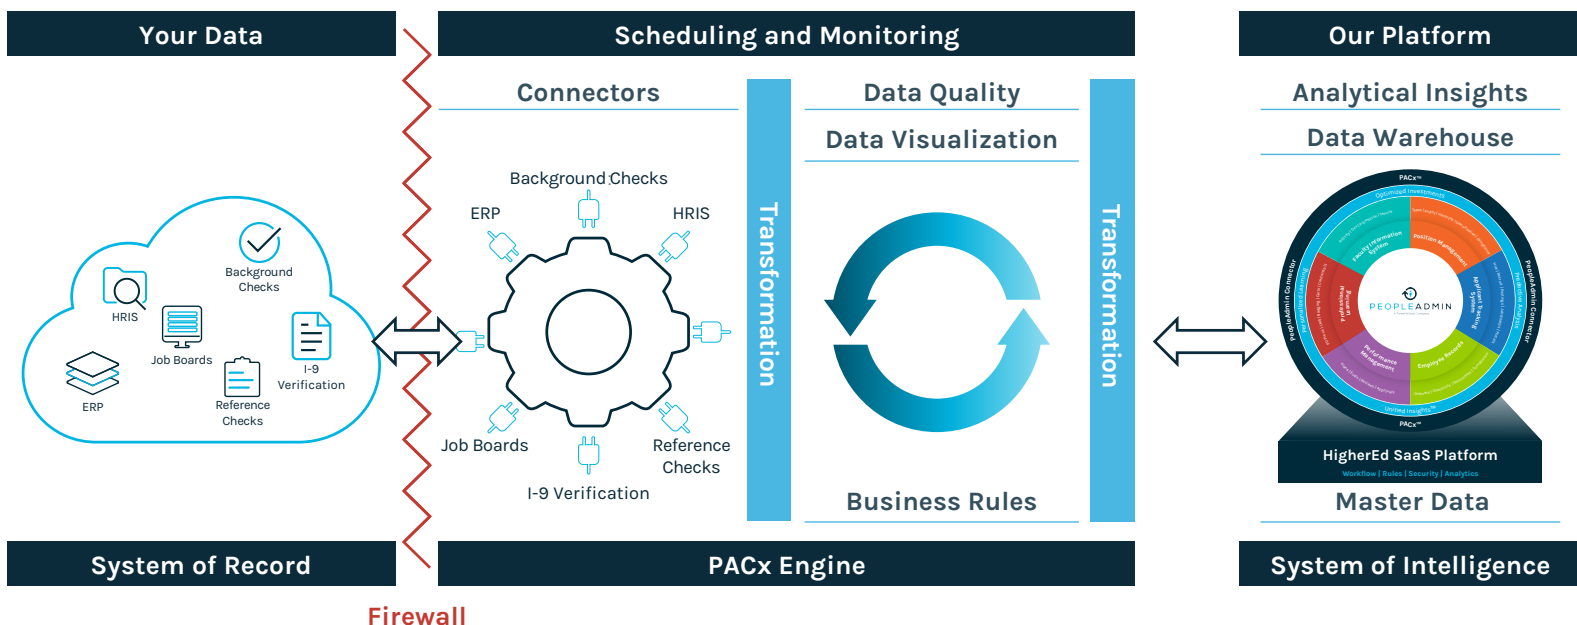

PeopleAdmin, a PowerSchool Company, created a state-of-the-art pure multi-tenant SaaS open platform which solves the core problem of interoperability by creating connectors that are accessed through an App Store-like model. Based on 20+ years of HigherEd experience and open-source technology framework expertise, PACx™ is designed to meet the interoperable demands of higher education, resulting in:

Reduce Costs: Manage data and interoperability across staff, administrators, and IT

Increase Quality: Ensure data integrity and through loosely coupled interoperability

Centralize Data: Create a single source of truth to provide consistency and continuity

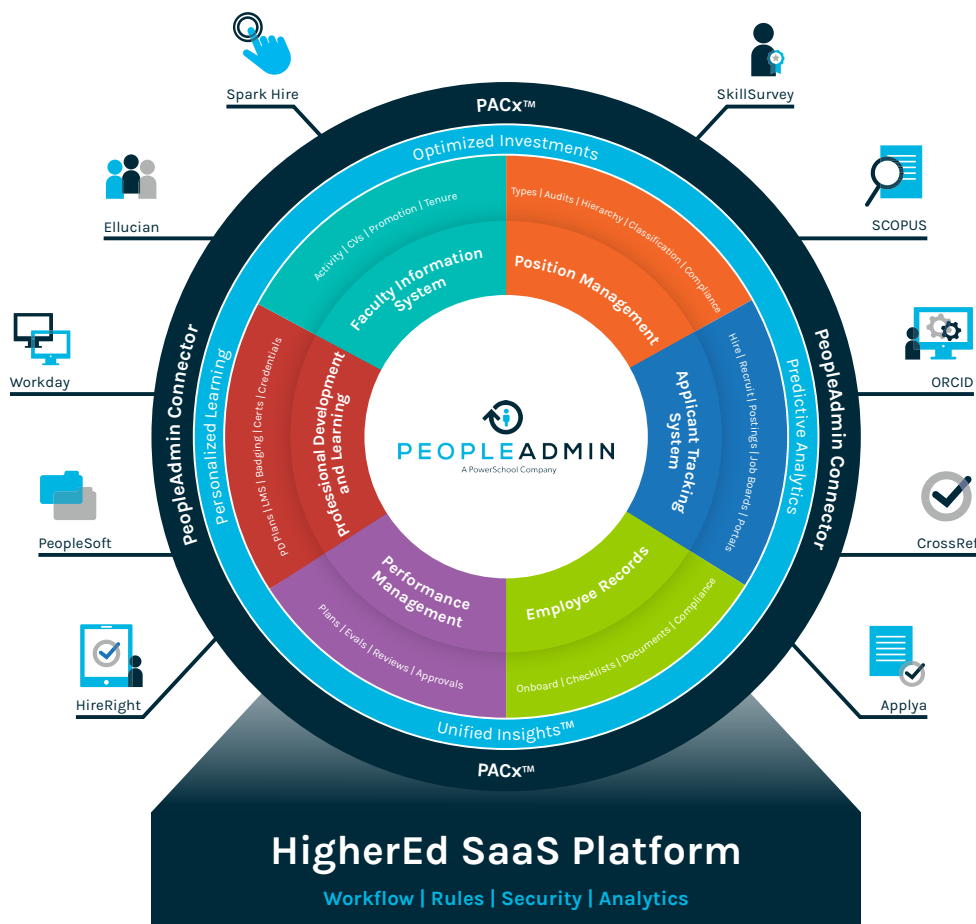

Gain Insight: Act on rich analytics to meet the increasing demand for cross-campus compliance needs

The Advantage of Connected Technology

64% of administrators and staff agreed having data across systems more accessible made organizational change easier.* With PACx™, our robust and flexible solution offers connectors within your systems via bidirectional data sharing across your campus.

Our mission is to power the education ecosystem with unified technology that helps educators and students realize their potential.

Key Features

- **OUT-OF-THE-BOX CONNECTORS**

between software systems such as HRIS, ERP, background checks, job boards, reference checks, and I-9 verification services

- **DATA ACCURACY**

across institutions and university systems offices

- **NEGLIGIBLE IT MAINTENANCE**

reduce the burden on institutions via subscription

- **EASY CONFIGURATION**

and 100 percent ownership and maintenance by PeopleAdmin

- **ROBUST AND REUSABLE**

REST APIS built via open standards

- **RAPID DEPLOYMENT**

with easily verifiable outcome
