Faculty Information System

Freeing faculty to drive student outcomes
and institutional excellence

Faculty Information System

Faculty-friendly processes. Institutional insights.

Reduce administrative burden on faculty with a low-touch solution to collect and organize their academic achievements, education and work history, professional contributions, publications, and research.

When faculty dossiers are up-to-date, grant applications are faster, and promotion and tenure review is streamlined. Plus, cross-campus reporting and analytics help to better manage and promote the institution.

So easy, even faculty will use it

This low-touch solution collects and organizes achievements so dossiers stay current. When you free faculty from admin burden, they can **focus on what matters** and **productivity rises**. So intuitive and easy to use, faculty feel supported by a world-class institution.

Insights on-demand

Better **insight into faculty productivity**, research, grants, and publications help streamline the promotion and tenure process, adds **transparency to ensure an equitable process**, and gives institutions the complete picture to better promote their academic excellence.

Flexibility within a structure

Customized to **meet the unique needs and workflows of each department**, without sacrificing institutional oversight. Reporting rolls up into a **centralized overview** so faculty affairs doesn't have to manually combine multiple reports.

HigherEd Specific

Tailormade for unique faculty needs, from on-demand dossier, biosketches, and CVs, to promotion and tenure review. **Faculty are too important** to an institution for their support to be an afterthought or to be forced into a corporate solution.

Key Features

Data Management

Real-time connection with ORCiD pulls in data. Faculty can enter other achievements once, and reuse again and again.

Dossier

When faculties' dossier is kept current, they can quickly customize CVs and biosketches at the click of a button.

Promotion & Tenure Review

Easier for faculty to prepare and faster for committees to review. Allows customizable workflows, committee management and confidential recommendations.

Equity & Compliance

Robust analytics include metrics around diversity to bring transparency, avoid implicit bias, and justify decision-making.

Unified Ecosystem

Part of a unified PeopleAdmin solution for recruiting, hiring, onboarding, and development. Plus, a proprietary adoption methodology ensures success.

“Ditch the paper, **review on demand!** It's exciting to have faculty business processes that we can learn from, like **visual representations** of our tenure review.”

Analytics

The only hire-to-retire solution built for faculty

Leveraging PeopleAdmin's HigherEd Platform

As part of PeopleAdmin's HigherEd platform, Faculty Information System supports faculty-specific workflows from position approval, through search committees, seamless onboarding, and sets them up to contribute to the institution, student outcomes, and beyond.

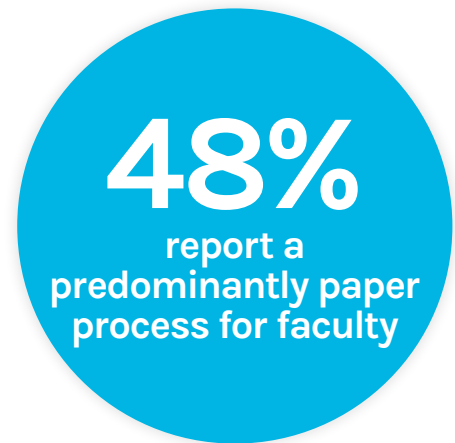

The comprehensive, faculty-friendly solution

An improved faculty experience

Faculty activity reporting is time-intensive and takes focus away from more critical work with students and research. It can be even more frustrating for faculty since they are asked to duplicate reporting on their work.

PeopleAdmin's FIS **streamlines and simplifies** that process. By automating activity reporting and making it so faculty can **enter information once and use it again and again**, it is an intuitive solution faculty actually want to use.

When reporting is easier for faculty, the administration gets the information they need, and faculty can **focus on what really matters**.

Insights to achieve educational & operational excellence

When each faculty member is better able to report up to their Dean, institutional leaders can make more strategic, data-driven decisions for the individual faculty member, the department, and campus-wide. This administrative intelligence can fuel efficiency, impact student outcomes, and further the organization's mission.

Workload allocation

Ensure each faculty member has a balanced workload between teaching, research, and service.

Accreditation reporting

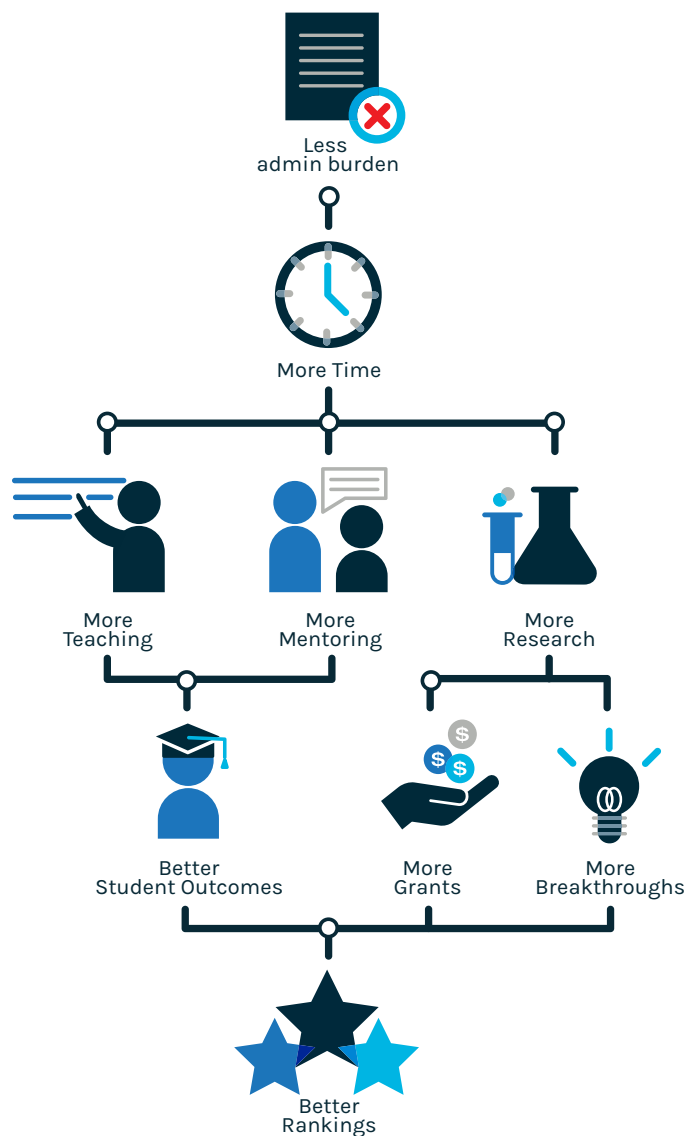

FIS simplifies the accreditation process with on-demand activity reports formatted to specific accreditation body requirements, available at the click of a button.

Analytics

Built on a backbone of Power BI Analytics, FIS gives institutions the information they need to make the decisions that drive their mission.

Promoting Institutional Excellence

When you free faculty from administrative burden, they can be more productive, **spend more time impacting student outcomes, apply for more grants, bring in more funding**, and make discoveries that will impact the way we understand the world.

With more academic output, and a streamlined way to capture it campus-wide, your institution can **better tell your story**.

88%
of HigherEd leaders agree not having a unified ecosystem prevents them from realizing full potential
